

Remarks

No new matter is introduced by the amendments which find support in the patent application as filed. Entry of the amendments is proper. The amendments to the specification add a cross-reference to the parent application from which the present application is a divisional filing based on a restriction entered in the parent case. Additionally a subsection title was provided to identify the paragraph starting at line 5 of page 1 as the Field of the Invention.

The claims were amended to cancel the non-elected claims being examined in the instant case.

Please contact me if you have any questions.

Respectfully submitted,

July 15, 2003
